

WOOKEY HOLE: FILMING: DR. WHO: 18-22. II. 74

MAIN WORKING SET-UPS

Notes

Monday - Rucksacks
 veggie walkie-talkies
 Guns FIP
 mattresses

Set up car + mailers + seats

Set up Rockfall - (vnu boxes)
 camera protection
 ready for Tuesday
 also boats in lake
 (climb from Director's car)

Tue - as above
 + set up balls in
 main beam area
 gold nuggets in lake

Wed/Thurs
 Build up to big
 explosion seq.
 (end Day 3/4)

Get in car ok here
 (will need planks, rope)

Risks AFM

All Arrows point down.

Subject: CYBERMEN

To: Ben Travers

You will have already received a commissioning brief for a four part Cybermen story to be written by Gerry Davis. Since, as you have pointed out to me, the copyright for the Cybermen characters lies with Kit Pedlar, I should be grateful if you would negotiate permission for their use. The relevant project nos. are: 2344/7052-55.

GERRY DAVIS

20th July, 1974

Robert Holmes Esq.,
Script Editor, "Dr. Who",
B.B.C. Television,
Threshold House,
Shepherds Bush Green,
London W.12

Dear Bob,

re: Dr. Who and the Return of the Cybermen

Further to my chat with Philip last week, enclosed please find two copies of the first episode of the Cybermen serial.

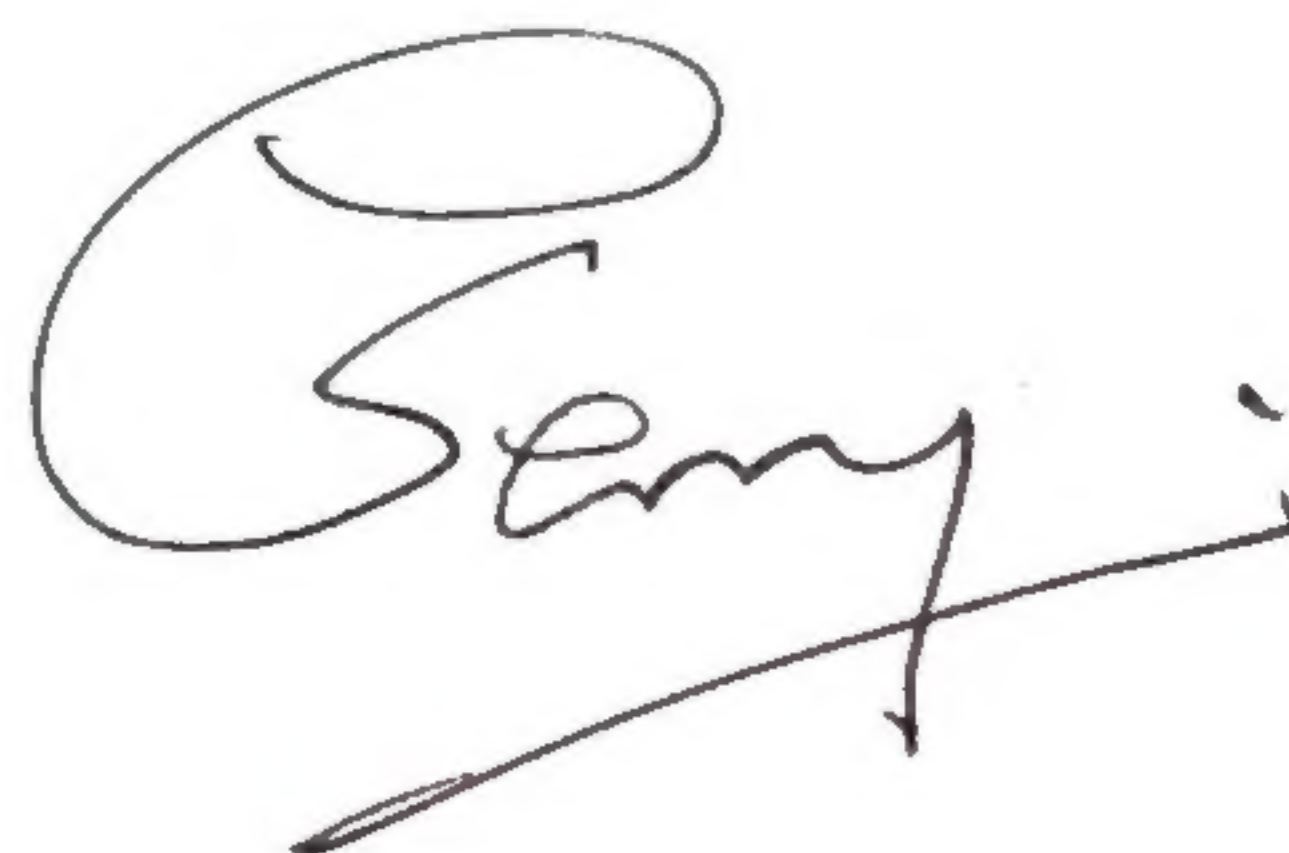

As discussed with him, there may well be further polishing to do when I have finished the other three scripts, but, as requested, I am putting this in ahead of the others.

Actually I am enjoying writing for Tom Baker. Best thing that happened to "Dr. Who" in quite a while, in my opinion, after seeing the first change-over episode last week!

I will be away for a few days but will telephone at the end of the week for any reaction that may condition the rest of the serial.

With kind regards,

Yours sincerely,

A handwritten signature in dark ink, appearing to read 'Gerry', with a long, sweeping horizontal stroke extending from the bottom of the name.

23rd July 1974

c.c. Harvey Unna.

G. Davis Esq.,

Dear Gerry,

Thank you for sending Episode One of 'Return of the Cybermen'.

I've gone through this script and discussed it with Barry and Philip. We all feel much the same way - that you have written it only for children. It's too straightforward (particularly in characterisation) and therefore rather dull.

Our audience these days is sixty per cent adult and so we need a level of interest behind the 'front' action. I think if you bear this in mind when working on the remaining episodes we shall all be saved a lot of trouble.

'Doctor Who' has probably changed considerably since your connection with it and, these days, we find our audience is ready to accept quite sophisticated concepts.

I am accepting Episode 1 - despite all these wounding strictures! - because I feel the flaws in the script stem more from your mental approach than anything inherently wrong in the story or its structure.

However, in case any heavy re-writing does eventually become necessary, I am sending a copy of this letter to Harvey so that he is fully in the picture.

Yours sincerely,

(Robert Holmes)
Script Editor
DOCTOR WHO

DOCTOR WHO 4D 'THE REVENGE OF THE CYBERMEN'

BACKGROUND NOTES

The following will be clear from the finished scripts but at this stage I think it needs spelling out in order to make sense of the scene breakdown.

At the end of the Dalek story the Doctor, Sarah and Harry return (by means of the Time Ring) to the Ark to retrieve the Tardis. On arrival they discover they have returned to the Space Station several thousand years before their last visit. At this earlier time the Ark is in fact a Space Beacon, the crew has been decimated by a mysterious plague, leaving only three survivors. The Doctor discovers the plague is caused by Cybermen with the help of the traitor Kellman. Secretly Kellman - a kind of space geologist - has found out that the nearby moon, Voga, is the only surviving remnant of the fabled Moon of Gold which was supposedly destroyed in the Cyberwar thousands of years before. Gold is the only substance which can kill Cybermen and having now learned of the existence of Voga the Cybermen are intending to destroy it once and for all. Their plan is to send the three surviving humans on the Space Station to the heart of the gold deposits on Voga with fission bombs locked on to their backs which will be detonated by remote control.

Kellman, however, has privately discovered that Voga - contrary to popular belief - is still inhabited by an underground people who survived the first Cyberwar. One of their number, Vorus, guardian of the Gold Mines, seeks personal wealth and power and aims to achieve this through rearming Voga nation against the potential Cyberman threat. Kellman in exchange for the promise of riches, informs Vorus of the impending Cyberplan. Vorus can use the missile he is constructing to blast the Cybermen on the space beacon, cover himself with glory, and in the process bring inter-Galactic attention to the Cybermen's aggression. Other nations will be forced to rearm using Vogan gold and thus bring vast profits to Vorus, some of which will find its way into Kellman's pocket. Kellman is thus playing a dangerous double game with the Cybermen on one hand and Vorus on the other.

Vorus, however, has a political opponent, Tyrum, who is a 'dove'. He wishes Voga to remain undetected by the outside world and only learns of the threat of the Cybermen and the dangerous policies of Vorus when Sarah and Harry land on Voga.

This is the background to the opening of the story into which the Doctor, as usual, throws a very large spanner.

DOCTOR WHO 4D 'THE REVENGE OF THE CYBERMEN'

STORY BREAKDOWN

EPISODE TWO:

Reprise

1. CREW DECK. Doctor decides Sarah might be saved if her molecules are jumbled up in the matter beam. Bare minutes in which to do this.
2. CONTROL ROOM. Harry is to go with Sarah because she's unconscious. They enter the matter beam and nothing happens. With Sarah getting worse the Doctor finds controls sabotaged.
3. CABIN. Kellman on his private radio (which we will have established in Ep.1) to Vorus, warning him to expect visitors.
4. VOGAN CHAMBER. Vorus sending guards to matter beam receptors. Important at this vital stage not to let outsiders fall into Tyrum's hands and perhaps give game away.
5. CONTROL ROOM. Sarah dying. Doctor working feverishly to repair damaged controls. Sarah and Harry dematerialised in nick of time.
6. CAVES. Harry and Sarah materialise. Sarah is better.
- 6A. CYBERSHIP Cybermen detect use of matter beam and jam it.
- 6B CAVES. Sarah and Harry explore a bit - before being grabbed by guards.
7. CABIN. Commander and Lester frogmarch Kellman to the Control Room. He has some explaining to do.
- 7A CONTROL ROOM. Doctor trying to operate return-control and finds it won't function.
8. CAVES. One of Tyrum's men sees Harry and Sarah being taken to the Vogan chamber. He hurries off to report to the boss.
9. VOGAN CHAMBER. Vorus questions Harry and Sarah. He is tense and nervous. The atmosphere is highly charged. They've no idea what it's all about but their future looks brief.
10. TYRUM H.Q.. Tyrum's man tells the boss he has seen strangers on their way to Vorus. Tyrum sends for Vorus.
11. CONTROL ROOM. Kellman on the hook. The Cybermat control box has been found in his cabin (the Doctor demonstrates how it works by whistling up a Cybermat) and a secret radio.
12. CAVES. Harry and Sarah languishing in chains, still unaware what fate is in store for them.
13. TYRUM H.Q. Tyrum and Vorus, full of courtesy, compliments and surface friendliness. But their basic enmity quickly comes to the boil and we start to understand the power structure on Voga.

(Tyrum is Prime Minister/City Boss. The ancient guilds - trade unions - give Vorus his power base. He controls the gold galleries and thus the route to the surface).

EPISODE TWO (cont'd)

14. CONTROL ROOM. The Doctor reveals the link between Cybermats and Cybermen. Kellman is clearly playing for time. The Commander threatens to execute him (A statutory power of Space Corps commanders) unless he quits stalling.

15. CAVES. Harry and Sarah painfully trying a Houdini stunt.

16. TYRUM H.Q. Tyrum tells Vorus he is moving his own men into the galleries for State Security reasons. Vorus gets word to his chaps to bump off Sarah and Harry.

17. CONTROL ROOM. Kellman runs out of time. The Commander is about to shoot him - against the Doctor's wishes - when Lester picks up an approaching spaceship. It fails to acknowledge their call signals.

18. CAVES Vorus' guards arrive to kill the captives. Harry and Sarah have just escaped.

19. CONTROL ROOM. The spaceship is still coming on, ignoring warnings that the beacon is plague-ridden. They get a picture on the screen and identify it as an alien craft.

20. MODEL SHOT. Spacecraft docks on the beacon.

21. CAVES. Lethal hide-and-seek. Sarah and Harry are finally cornered. The guards raise their guns to administer the coup-de-grace.

22. CONTROL ROOM (OR TRANSOM?) Cybermen enter the beacon. They 'shoot' the Doctor, Commander and Lester.

Footnote:

At this point, although we don't yet know the half of it, the plan of the Kellman-Vorus axis is rapidly becoming unstuck. In order to save his own skin Kellman has had to call in the Cybermen. Down below on Yoga the rocket intended to destroy the beacon is nowhere near ready. And with the galleries now coming under Tyrum's control, it is going to become increasingly difficult for Vorus to conceal what is afoot.

EPISODE THREE:

Reprise

1. CONTROL ROOM (OR TRANSOM?) The Cyberleader orders his human captives to the Crew Deck. Kellman is revealed as a traitor.

2. CAVES. Harry and Sarah are saved by the arrival of Tyrum's men.

3. CREW DECK. Cyberleader/Doctor exposition about the golden planet and how it was only partially destroyed in the first Cyberwar and how its core was blown into this solar system and how the Cybermen have been hunting for it ever since, etc.

4. VOGAN CHAMBER. Vorus insisting that Tyrum's city scum must never enter this holy of holies, the inner sanctum of the goldworkers. (The reason is that he has a CSO rocket the other side of a grille)

5. CAVES (outside the Vogan chamber) Battle between Tyrum's police and Vorus's guardians.

6. TYRUM H.Q. Harry and Sarah are explaining yet again how they came to be running around the caves. Tyrum most interested in the transmat beam. During this he is told that the galleries are now under his control with the exception of the inner sanctum which is being stoutly defended. He tells his chaps to call off the fight. Vorus can keep the inner sanctum for the present.

7. CONTROL ROOM. Kellman beams down to Voga to go to Vorus and tell him of the premature arrival of the Cybermen on the space beacon.

8. CREW DECK. The Doctor increasingly concerned about the length of time Sarah and Harry have been gone. This gives the Cyberleader pause for thought. How could they have run into trouble on an uninhabited planet? Not uninhabited says the Doctor and refers to cryptic radio call in Ep.1. So?, hisses the Cyberleader. And being a sophisticated Cyberchap he begins to toy with the idea that Kellman might be double-crossing him.

9. CAVES. Kellman is picked up by Tyrum's police

10. VOGAN CHAMBER. Vorus is urging his scientists to work double shifts on the rocket. Around this point we should realise the full extent of Vorus's ambitions, the subtleties of his plan, and the fact that the Cybermen have walked into a carefully laid trap.

11. TYRUM H.Q. Enter Kellman. Surprise, surprise for Harry and Sarah.

12. CREW DECK. Cyberleader fretting because Kellman hasn't returned. But Cyberplan must continue. Lester, Commander and Doctor strapped into bomb-laden rucksacks.

13. TYRUM H.Q. Kellman's nerve is failing fast. He knows the Cybermen will be going ahead with the bomb plan and has no wish to be blown up. Tyrum decides to let Kellman go and have him tailed.

14. CAVES. Harry and Sarah have been allowed to escape along with Kellman. The three are temporary allies. Kellman tells them about Vorus's rocket and how it represents the only way of stopping the Cybermen.

EPISODE THREE (cont'd)

15. TYRUM H.Q. Above conversation picked up on Tyrum's parabolic mike. It decides him to move his musclemen in on Vorus.

16. CAVES. Sarah says they must warn Doctor if they're going to start firing rockets. Kellmann doesn't want this, naturally, because Cybermen will be alerted. He tries to stop her - Harry intervenes and is stunned. Then Tyrum's men arrive and a melee starts outside the Vogan chamber. During this Sarah slips away to matterbeam.

17. CONTROL ROOM. Sarrah arrives on Space Beacon and just has time to hide before Cyberleader enters with bomb-laden captives and sends them down to Voga with two Cybercompanions.

18 CAVES. Vogans attack Cybermen. Get beaten off. The Cybermen are guarding the end of the shaft down which Doctor and companions are wading their way.

19. VOGAN CHAMBER. Kellman confesses Cyberplan. Vorus and Tyrum now agreed only answer is to expedite rocket. Tyrum remembers ancient unused cross-shaft which connects with shaft Doctor and Co. are in.

20 CAVES. Doctor and Co. stumbling along, clocks ticking to countdown

21. CAVES. Tyrum and Harry struggling through dank workings.

22. CONTROL ROOM. Cyberleader watching radar blip and counting off the seconds. Sarah, listening, realises Cyberleader has no intention of fulfilling his part of the contract - i.e. releasing rucksack locks and allowing Doctor and Co. time to retreat.

23. DAVES. Tyrum and Harry burst through end of bunged-up cross-shaft into main tunnel. Doctor and Co. just passing by - falling rock clouts Doctor, stuns him. Harry springs down and starts to unlock Doctor's pack!

EPISODE FOUR

Reprise

1. CAVES. The Doctor recovers and stops Harry blowing him up. He discovers Sarah has gone to the Beacon. He decides they have gone far enough into the mountain for their individual blips not be distinguishable on radar.
2. CONTROL ROOM. Cyberleader watches the blip approach the target zone.
3. CAVES. The blip is the commander trudging on alone. The Doctor and Lester, Harry and Tyrum are creeping back towards the Cybermen.
4. VOGAN CHAMBER. Vorus setting up the rocket for firing.
5. CAVES. The Cybermen still beating off attacks by the Vogans. The radar relay apparatus is beside them. Lester creeps to the edge of the shaft.
6. CONTROL ROOM. Cyberleader calls his men, tells them to get into matterbeam. Sarah jumps him, causing a delay.
7. CAVES. Lester launches himself out of the shaft, unclips his buckle - and there is a big explosion which wipes out Lester, both Cybermen and the radar apparatus. Kellman who has been fighting with the Vogans, is also killed.
8. CONTROL ROOM. Cyberleader loses his radar picture. Punches the manual firing button.
9. CAVES. The Doctor removes his rucksack.
10. CONTROL ROOM. Cyberleader realises Plan A has failed. There remains Plan B.
11. VOGAN CHAMBER. The rocket is almost ready. Tyrum and Doctor and Harry come in. Vorus anxious to see none of the credit for his masterstroke rubs off on Tyrum. Doctor pleads for time - ten minutes - in which to return to Nerva beacon and deal with Cybermen (thus saving Sarah).
12. TRANSOM. Cyberleader supervising inloading of explosives to transform beacon into a huge missile.
13. CONTROL ROOM. Doctor emerges in Control Room and sets about sabotaging Cybermen with gold-dust. Sarah is there, tied up, and he releases her.
14. VOGAN CHAMBER. Vorus anxious to press the red button. Tyrum insists the Doctor be allowed his full ten minutes.
15. CREW DECK. Doctor destroys one cyberman
16. CONTROL ROOM. Cyberleader sees Sarah has been freed and realises he has a problem. He puts the beacon into motion.

EPISODE FOUR (cont'd)

17. VOGAN CHAMBER. Vorus can't wait any longer for his moment of triumph. He presses the button. Harry tries to stop him and is struck down. Tyrum shoots Vorus but the rocket is on its way.

18. CONTROL ROOM. The Doctor launches his gold attack against the Cybermen. He and Sarah are captured, tied to the control deck and left to die in the coming explosion. The Cyberleader leaves with a merry laugh.

19. MODEL SHOT. The Cybership and the beacon part company.

20. VOGAN CHAMBER. Tyrum sees the beacon heading his way and realises that the Cybermen have left the beacon.

21. CONTROL ROOM. The Doctor and Sarah wriggle over to the radio. By radio the Doctor directs Tyrum, Harry and the Commander on the necessary procedures for changing the course of the rocket.

22. VOGAN CHAMBER. (Intercutting) Tyrum, Harry and the Commander effect a change in the path of the rocket.

23. MODEL SHOT. (And on scanners) The rocket changes direction and hits the departing Cybership. Big explosion in space.

24. CONTROL ROOM. On the scanners the Vogan planet is rushing upwards. The Doctor and Sarah free themselves. Frenziedly the Doctor works to unlock the gyro-tillers.

25. VOGAN CHAMBER. Tyrum & Co. resign themselves to the doom approaching at twenty million miles an hour.

26. CONTROL ROOM. The Doctor unlocks the gyro-tillers, takes over manual control, and the beacon-ship skims across the surface of Voga... then up into the far blue yonder. Voga is saved.

27. VOGAN CHAMBER. Doctor comes through on radio and tells Harry and Commander to get their skates on. The Tardis has turned up at last and it is time they were on their way.

28. CONTROL ROOM. The Doctor locking the beacon back in orbit. Tardis in background. Harry the Commander back to space beacon.

Philip Hinchcliffe

FROM: Philip Hinchcliffe

SUBJECT: DR WHO: REVENGE OF THE CYBERMEN

September 4th, 1974

TO: Bob Holmes Copy to: Barry Letts

I thought I would put a few thoughts on paper about these scripts since they are quite extensive.

Basically, I think this story will work although I am unhappy about Gerry Davis' 'elementary' style of writing which never rises above telling the basic plot. We need to improve the dialogue where ever possible therefore, and flesh out the characterisation, particularly of Commander Stevenson and in places the Doctor himself. As a general point about the season I am a bit worried that Sarah's role is being reduced too much and she should be given more to do in this story if possible.

Episode 1 is probably quite a large rewrite and I have told Gerry that we will be doing it. In the opening scene there must clearly be references to the Doctor's previous visit to the Ark and the audience must be in no doubt as to the exact time and stage of development on the Ark. Losing the teaser, Captain Warner should be discovered isolated and abandoned and throughout the episode there should be no direct contact with him (ie: no-one in the same room) as this would destroy the motivation of the other crew members in this episode. I think we need to invent something less ridiculous than the Doctor leafing through his diary to solve the mystery of the scratch marks. As written he simply has a mental block for a few hours and then remembers.

As I said, Commander Stevenson's character should be built up - his is a genuine concern to stop the plague spreading throughout the Nerva and the arrival of the Doctor & Co faces him with a difficult moral decision.

I think we need some background (perhaps from the Doctor) about the Cybermen and their attributes and I am a bit unhappy about the references to Kellman as the only surviving scientist aboard and what this is meant to indicate. Gerry Davis says that Kellman conducts experiments which is why there is a room for crushing mineral ore and is his explanation for the rather fortuitous bottle of gold dust which Anitra finds to throw at the cybermats in Scene 20. I suppose this is just about acceptable but we need to look hard at Kellman's motivation throughout the story and probably build up his greed for gold.

In Episode 2 I think again the Doctor consulting his diary is a clumsy device and it would be better to have more dialogue in this scene between the Doctor and Commander Stevenson building up the background and threat of the Cybermen.

The X-ray 'gun' is a nonsense scientifically speaking so we must find a proper explanation because it wouldn't bang and flash.

Evans, the murdered miner, needs to be planted more strongly - perhaps the rest of the crew talking of his disappearance before the plague.

Also, I think the climax of this episode is handled badly. The Commander & Co. discover the Doctor and Harry too quickly. There is no menace if we know they are about to be saved. Likewise the revelation of Kellman's evil role is too simple and poorly stage managed.

I won't go into Episode 3 much except to say that Gerry Davis is rewriting the whole of the 'miners' scenes more closely along the lines we originally envisaged. In this lost colony of humans the gold has acquired a totemistic value and the Doctor has to save them in spite of themselves. On a scientific point we shall check whether human life is feasible on an asteroid.

Shonell

Episode 4 works reasonably well I think, although Harry has more action than the Doctor. Perhaps we could reverse their roles in this episode. I wonder also if it is a bit short. The ending, of course, will have to be rewritten to link up with the next story.

September 10th, 1974

Dear Gerry,

Bob and I have now had a chance to discuss all four scripts and first of all let me say thank you very much. I am sure this will turn out to be a vintage story.

As I mentioned on the phone the other day there will be a few changes. In Episode 1 the opening few scenes and possibly some of the Doctor's lines to bring his characterisation more into line with the rest of the scripts, and in Episode 3 the mine scenes which I still think can be improved. Episodes 2 and 4 work very well by and large although we may need to make the Doctor more obviously active at the climax of the story - perhaps giving him some of Harry's action. Finally, of course, we shall have to rejig the final scene to tie it in with the next story.

Bob feels he can cope with this alright but I thought I would just keep you in the picture. Will be in touch with you soon, no doubt.

With best wishes,

Yours sincerely,

.....

Gerry Davis, Esq.,

September 18th, 1974

Dear Carey Elyton,

I tried to contact you by phone but got no reply so thought it would be quicker to drop you a line.

I discussed with Michael the question of incidental music for his next Doctor Who serial, called by the way 'The Revenge of the Cybermen', and he would be very nappy to work with you on it if you are free. Michael joins on September 30th and the studio days are December 2 and 3. and 16 and 17 and the transmission is in April and May, 1975.

Perhaps you would like to give me a ring and let me know whether these dates sound feasible as far as you are concerned.

I look forward to hearing from you,

Yours sincerely,

.....

21. ix. 1974

Dear Philip Hinchcliffe,

re: THE REVENGE OF THE CYBERMEN

Thank you for your letter about the above dated September 18,
which arrived this morning.

I'm sorry to hear that you've had trouble raising me; I've
been chained ~~///~~ to my desk the past fortnight (apart from last Tuesday in
town) writing a 30-minute children's cantata for BBC (Sound) Schools
Broadcasting's "Music Workshop" (15 minutes music). We do have trouble in
this way, caused, I believe, by the fact that Swanley is a fast expanding
'over-spill' town, and the antique telephone exchange at Dartford can't
cope. So it tends to give the 'engaged tone' for all incoming calls when
it can't cope, or something! Furthermore, we recently had a '6' prefixed
to all Swanley numbers, which adds to the confusion. However, the number
is Swanley 64380, the STD Code being 0322.

I am naturally delighted to learn that Michael's "Dr. Who" is
imminent, and that he'd like me to provide the music for it. I would be
very happy to do so, and your timing could not have been better - I was
putting the finishing touches to "The Rainbow Snake" for "Music Workshop"
as your letter arrived!

The dates you give are quite feasible, and I'll ring you on
Monday morning to discuss meetings, etc.

Thank you for asking me; I shall look forward to another very
fascinating and exciting time in the world of the indomitable Doctor!

With all very best wishes,

Yours sincerely,

Carey Blyton

PRELIMINARY LIST

VISUAL EFFECTS MODEL SHOTS (against "space"
background)

"DOCTOR WHO" (4D)

'The Revenge of the Cybermen'

Director: Michael Briant, Room 403, Thres. Ext: 2230/7714

1. Establishing shot BEACON - straight & C.S.O.
2. BEACON & VEGAN related (BEACON f.g. VEGAN b.g.)
3. Establishing shot CYBERSHIP L - R & C.S.O.
4. X BEACON to CYBERSHIP (related)
5. CYBERSHIP docks onto BEACON.
6. CYBERSHIP undocks from BEACON.
7. CYBERSHIP travels L - R.
8. CYBERSHIP & MISSILE hit each other and explode.
9. MISSILE takes off from VEGAN R - L - C.S.O.?
10. MISSILE travels R - L and alters course.
11. Establishing shot of the DEVASTATED PLANET OF VEGAN
straight/C.S.O.
12. VEGAN approaches closer and closer. (monitor eyeline of
beacon) until we are so close we swerve between
mountain tops (a near miss!!!).
This is on a C.S.O. monitor from Dr's eyeline and
can have "cuts" in it.
13. The BEACON skims between VEGAN mountains.

10th October 1974

October 10th, 1974

Dear Gerry,

I am dropping you a line to keep you in the picture regarding the 'Revenge of the Cybermen'.

Bob and myself have reviewed the scripts and still feel some changes are required.

As it stands at the moment the serial is almost entirely confined to the space station and the battle with the Cybermen. From episode two onwards there is plenty of incident but very little real development and the story runs a very grave risk of becoming boring. I think Bob and I half sensed this danger when your episode one came in but it has now become much more apparent in our discussions with the director.

Basically what is needed is (1) a proper sub-plot featuring the 'miners' (whom we want to make more alien still) - which will enable us to shift more of the action on to the 'asteroid' and thus open up the story considerably; and (2) make more involvement for Harry and Sarah. At the moment Sarah does very little until episode four and Harry's role overlaps with the Doctor's.

The rest remains the same with Kellman's treachery, the cyberplague and the Cyberplan to destroy the 'planet of gold'.

I realise in some respects these go beyond our original storyline but I hope you will view them as additions to your original scripts rather than rewrites. At this late stage, of course, it would be unfair and impractical to ask you to do this work and the best thing is probably for us to send you copies of the rewritten scripts as they become ready.

Hoping this meets with your approval.

Best wishes,
Yours sincerely,

.....

Manhour allocation for serial is 2,000 MH.

There are 150 MH for Filming Zero Wk.45. The remainder can be split as required. At present Planning have 1,500 for wk.49 and 330 for wk.51 I have taken back 330 to leave 2,000.

Money allocation for serial is £3,200.

Michael will probably record all Space Beacon & Cyber Ship Sets in first pair of Studios, and all Vogan Sets in second pair of Studios.

A handwritten signature in dark ink, appearing to read 'George Gallaccio', with a long horizontal line extending from the end of the signature.

28th October 74.

H.B. Apologies, no photo-call forms available.

November 6th, 1974

Dear Gerry,

Here is a set of your Cybermen scripts. They have been, as you will see, extensively rewritten, and rewritten again! Most of this work was necessary to meet our existing set situation or to conform with location filming requirements. I have only just completed work on them.

If you want to attend any of the recording sessions please give me a ring.

Yours sincerely,

Robert Holmes

Gerry Davis, Esq.,

FILE

5. The use and extent of injury or disease: **Shock**

1a. Treatment given or given:

1b. Had to - please give treatment:

2. If absence from duty has resulted, state at which absence began:

**Kept warm and taken to hospital - valium was prescribed
prescribed by the doctor. (Dr. Pinching)**

6. Date and time of accident: **15.30. 20.11.74.**

7. Date accident reported: **20.11.74.**

8. Address at which accident occurred: **Wockay Hall Caves, Wells, Somerset.**

9. Exact location of accident:

On the lake in the first chamber, known as the 'Witches Parlour'.

10. Nature of work carried on there:

Location Filming

11. For details of how and what happened and what injured persons was doing. If there was a fall of a person or of material or plant, give the height of the fall, if it was due to machinery, state the make and type of machine and the part which caused the accident and any whether the machine was in motion by mechanical power at the time.

Miss Sladen was acting in a scene involving driving a small speed boat known as a 'Ginella', across a lake in the Witches Parlour. The boat got out of control and Miss Sladen threw herself off the boat into the water to avoid hitting the side of the cave. She was immediately rescued by Terry Walsh, a stuntman, who was standing by in case of such an emergency.

12. Names of witnesses (and addresses if not members of staff):

R. Brian H. County.

13. Were any Safety Regulations infringed?

No

14. What steps has it been possible to take to prevent a similar accident?

Filming of the sequence ceased.

15. Did the accident happen while the injured person was on duty or fulfilling a contract and at a place where he was authorised to be for his purpose?

Yes

16. Was he doing what he was authorised or permitted to be doing for the purpose of his work or contract?

Yes

17. Did he, if a member of staff or contractor's employee, do any work on the day of the accident after it happened or if an agent or speaker, was he able to continue rehearsal or performance?

Yes

18. If the injured person is a member of staff, what was his basis of duty on the day of the accident?

BOOK

19. Signature of injured Person (if available):

20. Signature of Reporting Officer:

Harry Cottrell.

Designation: **H.S.M. Tel.**

ACCIDENT AND INDUSTRIAL DISEASE REPORT FORM

To: Insurance Manager
H. Page 5

1. Full Name: **Henry Walsh**

2. Age:

3. Private Address:

4. If Member of Staff state Staff Number, Occupation and Department.
If Artist or Speaker, State Programme, Producer, and Date of Performance.
If Contractor's Employee, state Employee's Name and Address.

"Dr. Who"

P. Birchcliffe

5. Nature and extent of injury or disease

Mr. Walsh had swallowed water.

6. Is Treatment given for injury:

Taken to hospital for check-up / Dr. Finching

(b) Name of person giving treatment

7. If absence from duty has resulted, state on which absence began:

8. Date and time of accident

13.20. 20.11.74.

9. Date accident reported:

20.11.74.

10. Address at which accident occurred:

Wockay Hole Caves, Wells, Somerset.

Exact location of accident

On the lake in the first chamber, known as the Witch's Parlour

11. Nature of work carried on there:

Location Filming

12. Full details of how accident happened and what injured person was doing (if there was a fall of a person or of materials or plants, give the height of the fall. If it was due to machinery state the name and type of machine and the part which caused the accident and say whether the machine was lubricated by mechanical power at the time)

Mr. Walsh dived into the lake to save Miss Bladen, who had to jump off a small speed boat because it was out of control. In doing so, he swallowed water. Mr. Walsh a stuntman was standing by in case of such an emergency.

13. Name of witnesses (and addresses if not members of staff):

M. Brian M. Conway

14. Were any Safety Regulations infringed?

No

15. What steps has it been possible to take to prevent a similar accident?

Filming of the sequence ceased.

16. Did the accident happen while the injured person was on duty or fulfilling a contract and at a place where he was authorized to be for this purpose?

Yes

17. Was he doing something authorized or permitted to be done for the purpose of his work or contract?

Yes

18. Did he, if a member of staff or contractor's employee, do any work on the day of the accident after it happened, or, if an agent or speaker, was he able to continue rehearsal or performance?

Yes

19. If the injured person is a member of staff, what were his hours of duty on the day of the accident?

20. Signature of Injured Person (if available)

21. Signature of Reporting Officer

Harry Cottrell

Dear Christopher,

I'd just like to thank you very much for turning out at Olympia. I understand from reg Marsh that it went extremely well and the Cyberman was a great hit.

I would also like to mention how pleased we all were with your performance on the programme, and I am sure we shall meet up again in the not too distant future.

Best wishes,

Yours,

Philip Binchcliffe

Michael Briant, Esq.,
c/o Philip Hinchcliffe, Esq.,
Producer, "Dr. Who",
BBC-tv Centre,
Wood Lane,
LONDON W12

13. 11. 1975

Dear Michael,

re: THE REVENGE OF THE CYBERMEN

I've just put the finishing touches to the music for Episode 2, so I thought this would be a good point at which to give you a 'progress report'.

The instrumentation finally gelled as follows: trumpet, trombone, and two percussion players; i.e. 4 players in all. The two percussion players use a wide variety of percussion instruments (all the usual things like scrapers, wood blocks, side drum, bass drum, claves, maracas, etc.), and having two means that we can have two xylophones, and two vibraphones, etc. This is really useful.

The trumpet (ordinary orchestral trumpet) doubles on the high Bach trumpet, the very high piccolo trumpet and - a real bonus! - the cornett: this is a modern reconstruction Renaissance instrument like a cow horn with a trumpet mouthpiece on it which produces a marvellously brilliant and piercing sound, which is very thrilling when very high.

The trombone player uses a combined tenor/bass trombone (ordinary orchestral variety), and also doubles on alto trombone (a high trombone), the serpent - a splendid 'obsolete' instrument much used at one time in military bands, and the ophicleide - another 'obsolete' instrument used in older music (viz. early 19th century). The sound of the serpent is rather like a bassoon, especially when highish, and the sound of the ophicleide is like a tuba when low and a rather fascinating sort of euphonium when high. The player I've booked is considered to be the most expert player of these instruments in the country. (Likewise the cornett player.)

Once I'd made the decisions about the instruments, everything fell beautifully into place. I've used the serpent (with xylophone and side drum; a march-like theme) to represent the "hawk" Vogans - very decisive and 'military' (after all, they are the Guardians of the Mines.) The ophicleide is used for the "dove" Vogans; its sound is softer, and their music is more expansive - peaceful, if you like. The Cybermen are represented by the (very high) piccolo trumpet up until they enter Space Station Nerva at the end of Episode 2, when the cornett comes into its own (with discordant tubular bells and the side drum playing on the metal

2.

rim of the instrument) - this is over a tenor/bass trombone pedal note (a very horrendous noise!), so the overall effect will, I think, be quite shattering! If we don't make the Cybermen very terrifying with this, then we can't do any more

I was going to keep the cornett back completely until this moment, but decided to have it once or twice before this, playing quite low, when we see the Cyberman spaceship speeding towards the space station.

The music has gone well (it's surprising how a decision about exactly what instruments to use helps!), and I think that Philip will feel very justified in suggesting to me that we should have a melodic instrument. The decision to use a trumpet naturally led on to the trombone, as a complement, and this, too, helped things a lot. In M11 (where we first realise Kellman's double agency), we've got the Cyberman theme on trumpet and the "hawk" Vogan theme on serpent; not only a fascinating musical combination but, more importantly, a dramatic way of 'telling' people about it musically.

I understand from the "Dr. Who" office today that it seems inevitable that the second recording session on March 20 will have to be postponed for about a month, since Episodes 3 & 4 won't be edited in time. Never mind; as long as I can get my score back on Episodes 1 and 2 (i.e. from the copyist), I can carry on working out the material later on. In the meantime, I must turn my attention to a trio for violin, clarinet and piano based on Newfoundland folk songs, a commission from a chamber group in St. John's which is supposed to be ready by the end of March! ("And now for something completely different")!!!!

I hope very much that all is going well on "Sutherland's Law", and that you, Monique and the children have settled down in Glasgow. I shall look forward to seeing you after the editing of Episodes 3 and 4.

With all very best wishes,

Yours sincerely,

CAREY BLYTON

10. vii. 1975

Dear Philip,

re: REVENGE OF THE CYBERMEN

Now that the dust over the above has well and truly settled even if the accounts aren't!) and I've managed to catch up on some pressing concert hall commissions, I thought I'd just drop you a line about the above.

It would be dishonest of me to say that I enjoyed every single minute of working on the above; I certainly enjoyed the actual writing of the music, as I always do. But the production was dogged by so many delays and problems that it became rather traumatic for everybody at the end, I think. I know that Michael felt that what he described as "the resurrection of a boring monster" put everything onto the wrong foot right at the very start, leaving aside the late arrival of the scripts and everything else.

However, I was very pleased to meet you, and I enjoyed working with you very much, especially at the Radiophonic Workshop, where what we were doing - albeit in haste - was more creative than the somewhat gruelling session in the Sypher Suite. (REVENGE OF THE CYBERMEN or NORMAN STRIKES AGAIN!)

I hope that I shall have the pleasure of working on another 'Dr. Who' again, on a less frenetic and harrassed production. If so, then it would, I think, be good if we could discuss the music in depth before anything was written - changing instruments (or adding them) in mid-stream is always a risky venture, though I think we got away with it this time - just!

Good luck with the ensuing productions, which must be well-advanced by now. I'm much looking forward to the return of the intrepid Doctor, as are my two small boys. ("And Father Makes Three"...?)

With all very best wishes,

Yours sincerely,

CAREY BLYTON
